

Home Energy Savings Scheme (HES)

The scheme is open to all owners of existing houses built before 2006. Sustainable Energy Ireland administers the scheme (www.sei.ie)

Grants will be provided to homeowners who invest in energy efficiency improvements in the following areas:

- Roof Insulation
- Wall Insulation
- Replacement of High Efficiency Gas / Oil Fired Boilers with Heating Controls Upgrade
- Heating Controls Upgrade
- Building Energy Rating (BER)

Grants are fixed for each type of measure. Grant approval must be in place before any purchase of materials or commencement of measures undertaken. Grants are paid after the measures are completed and the contractor has been paid by the homeowner.

- Roof: Roof insulation: E250
- Wall: Cavity Wall Insulation: E400
- Wall: Internal Wall Dry – Lining: E2500
- Wall: External Wall Insulation: E4000
- Heating Controls: High Efficiency Gas or Oiled fired Boiler with Heating Controls Upgrade: E700
- Heating Controls upgrade: E500
- BER Assessment: A Before works and After works BER assessment: E200

Full details are also available from any local or national political representative
